	Total	35	100%			

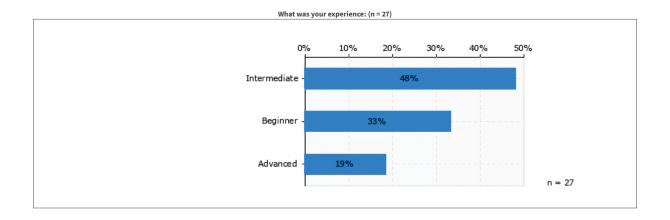

Do you have previous experience with version control systems like Git? (n = 35)

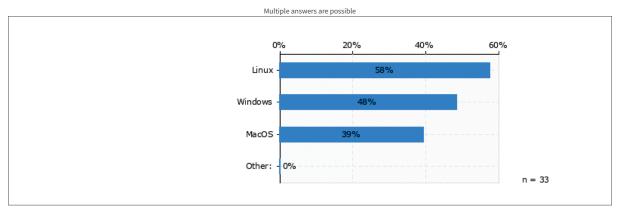

Which VCS have you used? (n = 56)

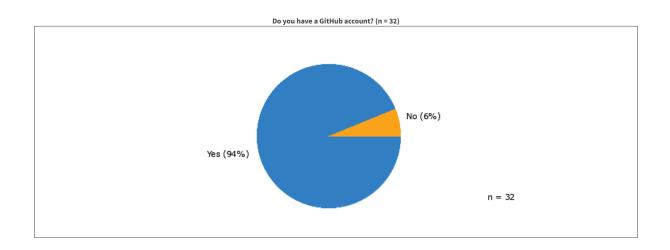

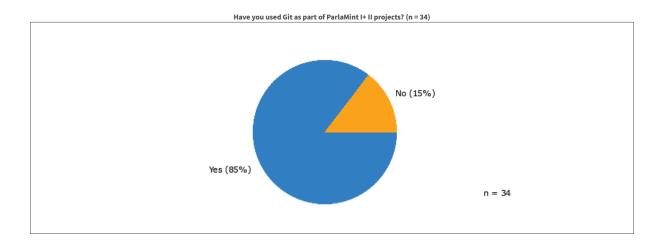

Which OS do you use for your work with Git? (n = 33)

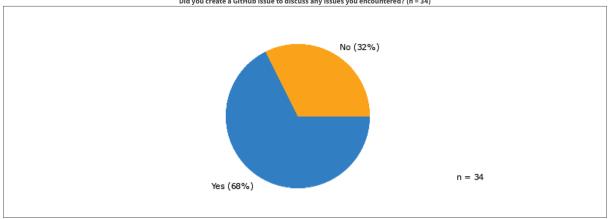

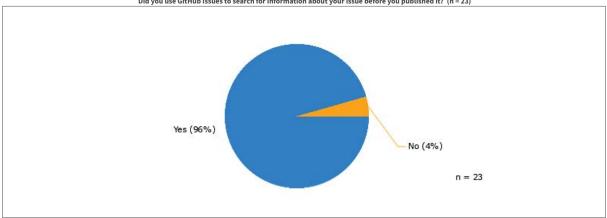

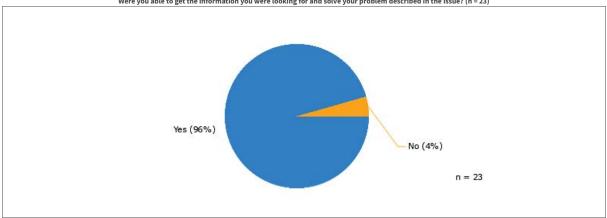

Did you create a GitHub issue to discuss any issues you encountered? (n = 34)

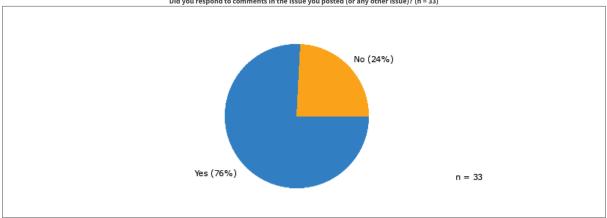

Did you use GitHub Issues to search for information about your issue before you published it? (n = 23)

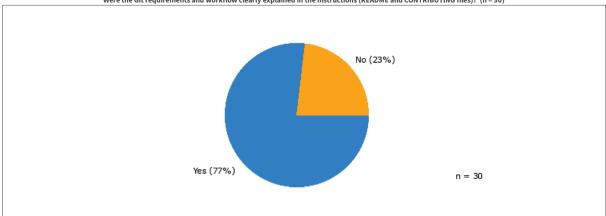

Were you able to get the information you were looking for and solve your problem described in the issue? (n = 23)

Did you respond to comments in the Issue you posted (or any other issue)? (n = 33)

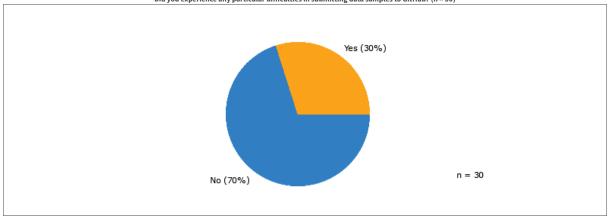

Were the Git requirements and workflow clearly explained in the instructions (README and CONTRIBUTING files)? (n = 30)

Please describe what was unclear:

Q17	Please describe what was unclear:					
	Answers	Frequency	Percent	Valid	Cumulative	
	-	1	3%	14%	14%	
	it is in the issues	1	3%	14%	29%	
	some instructions in the contributing file		3%	14%		
	should have been in the readme file	1	3%	14%	43%	
	some tei information regarding error messages	1	3%	14%	57%	
	were not clear.	I	3%	14-90	51%	
	readme linked to parla-clarin instead of					
	parlamint, upper limit of sample size was not				71%	
	clearly stated, paths to java libraries were	1	3%	14%		
	hardcoded, some of the tests assume linux (vs	1	370			
	osx), unclear that connlu and vertana were					
	autogenerated					
	the whole process with getting the sample	1	3%	14%	86%	
	approved first was unclear to me	1	570	1470	0070	
	the branches. the cases when pull request was					
	needed and the cases where no pull request	1	3%	14%	100%	
	was needed - but these may be obvious for	I	370	1470		
	others.					
Valid	Valid	7	20%	100%

Did you experience any particular difficulties in submitting data samples to GitHub? (n = 30)

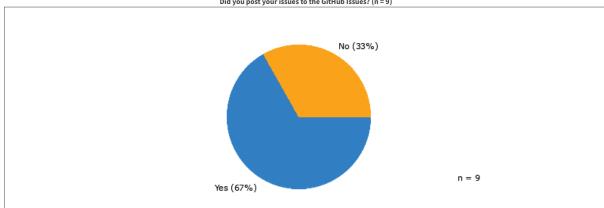

Please describe in more detail what the difficulties were:

Q19	Please describe in more detail what the difficulties	Please describe in more detail what the difficulties were:					
	Answers	Frequency	Percent	Valid	Cumulative		
	my first sample was too big. i did not know						
	github would run validation automatically on	1	3%	11%	11%		
	push.						
	i had no idea about the size restrictions so i						
	produced an initial sample which had to be	1	3%	11%	22%		
	downsized						
	repository forks and synchronization	1	3%	11%	33%		
	the size limit of the data sample was not clear						
	for me before first submitting the sample. and,	1	3%	11%	44%		
	again, to pull request or not to pull request :)						
	we have support from parlamint, but the						
	conversation was not very fluent, regarding	1	3%	11%	56%		
	some errors we had in the process.						
	i would not call it \ "difficulties\ "-proper: it was						
	not clear, that i should submit a sample (say 3)						
	of \ "full\ " tei files and you would strip down	1	3%	11%	67%		
	these to the files to a absolute minimum (only a	1	370	1170	0770		
	few utterances) yourself. that wasted a bit of						
	effort on my side.						
	errors in the parlamint-tei - several rounds of	1	3%	11%	78%		
	review	1	3%	11%	18%		
	due to my inexperience the automatic merge						
	did not work because my repository was not up	1	3%	11%	89%		
	to date with clarin-eric/parlamint						

	differentiating between the sample and full delivery (eg. [parlamint] v [parlamint sample]) made for a convoluted workflow in terms of version control	1	3%	11%	100%
Valid	Valid	9	26%	100%	
	-2 (Skipped question (IF logic))	22	63%		
	-3 (Drop-out)	4	11%		
	Valid	26	74%		
	Total	35	100%		

Did you post your issues to the GitHub Issues? (n = 9)

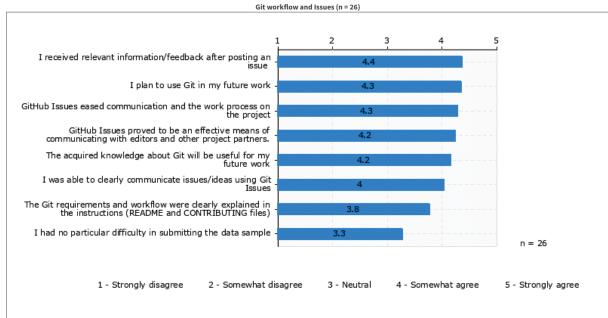

Were there any other features provided by the GitHub platform that you think eased communication and the work process on the project?

Q22	Were there any other features provided by the GitHub platform that you think eased communication and the work process on the project?					
	Answers	Frequency	Percent	Valid	Cumulative	
	other participants\ ' issues did answer quite a few questions we also had.	1	3%	17%	17%	
	validation of the corpus	1	3%	17%	33%	
	diffs and links to specific lines of a specific file of a specific commit.	1	3%	17%	50%	
	yes surely the general features helped	1	3%	17%	67%	
	it was the 1st time that i was using github issues as a kind of communication platform. i think the one important feature to make it a success wasn\'t the \ "github platform\" but the people (tomaz! matyas!) behind it, who were incredibly responsive to all issues at hand!	1	3%	17%	83%	
	i think the possibility to make pull requests and submit samples via automatics validation really streamlined the sample delivery process	1	3%	17%	100%	
Valid	Valid	6	17%	100%		
	-1 (Unanswered question)	22	63%			
	-3 (Drop-out)	7	20%			
	Valid	29	83%			
	Total	35	100%			

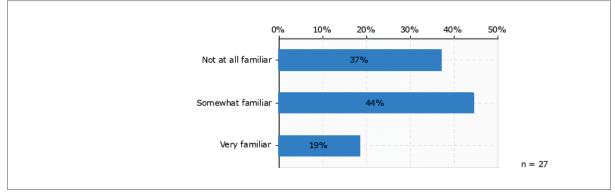

Any additional feedback related to workflow and submission process?

Q24	Any additional feedback related to workflow and submission process?				
	Answers	Frequency	Percent	Valid	Cumulative
	i helped preparing the samples/the data, but a				
	colleague submitted it in github. we had some				
	problems related to the fact that new versions	1	3%	17%	17%
	of the material in github were uploaded				
	without being notified.				
	parlamint issues and git issues are different	1	3%	17%	33%
	topics	I	3%0	17.90	33%
	the existence of the github issues really helped				
	me in troubleshooting my own problems / bugs				
	as i could search for other countries with	1	3%	17%	50%
	similar problems, which made the				
	troubleshooting much easier				
	video tutorial / workshop	1	3%	17%	67%
	i cannot stress enough how heplful people				
	have been every time i posted an issue. they		3%	17%	83%
	were able to perfectly understand what the	1			
	issue was, which is sometimes difficult to put				
	into words, and then reply in an extremely				
	useful way				
	i suggest running an xml formatter on commit,				
	so that every commit is formatted in the same	1	3%	17%	100%
	way. this would facilitate diffing and ensure	1	570	11.70	100%
	consistency across corpora.

How familiar were you with the TEI P5 Guidelines or TEI in general before you started working on ParlaMint? (n = 27)

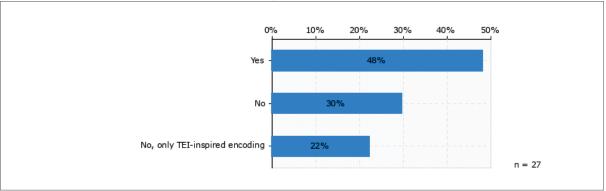

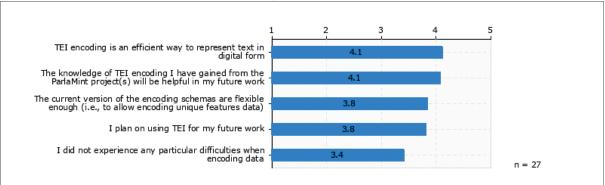

Did you need additional help (external sources) to become familiar with TEI before you started working on the ParlaMint project(s)? (n = 22)

Have you used TEI encoding for other projects before ParlaMint? (n = 27)

Have you used TEI encoding for other projects before ParlaMint? (n = 27)

Any additional feedback regarding the TEI encoding?

Q30	Any additional feedback regarding the TEI encodir	ng?			
	Answers	Frequency	Percent	Valid	Cumulative
	minimize $\$ "optional $\$ " features that end up	1	3%	33%	33%
	being not so optional.	·	3%	3370	3370
	not sure that a significant part of the parlamint				
	community was aware of the complexity of the				
	tei encoding process, me included. this should	1	3%	33%	67%
	be communicated in the future (is not easy to				
	assess, i know).				
	i believe my difficulty using tei came mostly				
	from my little knowledge about the tei norm				
	and about my own parliament, along with the				
	difficulty to express parliamentary data, as well				
	as trying to make it uniform through very	1	3%	33%	100%
	different parlimentary systems and languages.				
	all that put together made it a nightmare, but i				
	don $\$ 't think it could be made much easier. we				
	just had to work
